## **Vehicle access specialist Mobility Networks launches Nordic and Baltic operations**

The Mobility Networks Group, an international supplier of vehicle access solutions, has expanded operations into the Nordic and Baltic regions.

Mobility Networks supplies an extensive range of products for accessibility to buses, coaches, wheelchair accessible vehicles, ambulances, trams and trains. With headquarters in Kent, UK, this organisation provides one source for quality access solutions from across the world. These include wheelchair access lifts, removable seating, specialist floor rail systems and further solutions that ensure disabled passengers can travel safely. Mobility Networks Nordic will provide a complete service for vehicle builders and fleet operators that includes product supply, assistance with installation, servicing and after sales support. With over 15 years of specialist experience, Ricko Hedelund has been appointed as Managing Director for Mobility Networks Nordic ApS.

Ricko comments: "I am delighted to have been appointed as Managing Director for Mobility Networks Nordic. This expansion will deliver many advantages to local vehicle convertors as we combine quality access solutions with international expertise and local understanding. As part of our product range, we will be focusing on supply of bus and coach floor rails, specialist seating and powered wheelchair lifts. Our business recently acquired OKBeeRAIL which is a durable, lightweight rail flooring solution that provides flexible positioning of wheelchairs tie-downs and removable vehicle seating. This is now branded as 'FlexiRail' and is ideal for flat floor accessible vehicles ranging from mini-buses to coaches. FlexiRail has been crash-tested to full M1 standards and across a wide range of vehicle platforms."

Ricko continues: "In addition to FlexiRail flooring and seating solutions, we will also be introducing vehicle access wheelchair lifts to the Nordic and Baltic regions. Manufactured in the UK by the Mobility Networks' company, PLS (Passenger Lift Services), these powered platforms are precisely engineered and provide safe access for wheelchair passengers. Whatever specifiers, operators or convertors require, however complex, we are ready to provide a complete vehicle access service.

Mike Simmonds, Mobility Networks CEO added: "We believe the introduction of Mobility Network access solutions to this region will enhance performance and efficiency for fleet operators and vehicle convertors. Our safe and strong products will increase accessibility to public and private transport whilst maximising passenger safety through our international market intelligence."

**The Mobility Networks Group**

Established in 2014 with worldwide headquarters in Kent, UK, Mobility Networks is the leading multi-national specialist in accessible vehicle solutions. It provides a single source for all the latest innovations in vehicle access solutions from across the world. With a portfolio that is continually expanding, its products currently include vehicle access lifts, ramps, hatches, door opening systems and wheelchair accessible vehicle, lowered floor conversion kits.

Mobility Networks combines global expertise with local knowledge to deliver a world-class service. Its multi-lingual team is fully committed to resolving the needs of vehicle specifiers, bus and coach convertors and transport operators. This ensures all aspects of worldwide accessibility, safety and legislative conformity are met now and in the future. Mobility Networks' pioneering products are synonymous with quality and reliability and are further enhanced by a holistic support programme that provides proven design consultancy, installation and servicing.
